EDUCATION

National Institute of Technology Karnataka

M.Tech in CSE (Information Security) – CGPA: 8.86 (Current)

Surathkal

2025 – Present

Sri Venkateswara University College of Engineering

B.Tech in CSE – CGPA: 8.98

Tirupati, AP

2021 – 2025

Relevant Coursework: *Cryptography | Network Security | Database Security*

PROJECTS

Tutor-AI: RAG-based AI Study Assistant [\[GitHub\]](#)

- Built a **full-stack RAG study assistant** (FastAPI + React + FAISS + PostgreSQL) with PDF/PPTX/image OCR, Anki-style **spaced repetition flashcards**, adaptive MCQ quizzes with weak-topic detection, voice scoring, and **semantic YouTube search** across 200+ curated channels.
- Engineered **secure multi-user architecture** with JWT authentication, bcrypt, user-scoped FAISS indexes, file isolation by user ID, and ownership checks across **40+ API endpoints** — preventing cross-user data leakage.

StratOS: Autonomous Competitive Intelligence Agent [\[GitHub\]](#) [\[Live Demo\]](#)

- Built an **autonomous multi-agent AI system** using **LangGraph** orchestrating 4 specialized agents (Scout → Analyst → Strategist → Writer) to scrape competitors (OpenAI, Anthropic, Cohere), deduplicate signals via **Qdrant** vector similarity, reason with **Groq Llama 3.3 70B**, and deliver Slack briefings with **zero human intervention**.
- Deployed production-grade pipeline on Render + Docker with **PostgreSQL** (Neon), **LangSmith** full observability, Firecrawl web scraping, and a **REST API** — demonstrating end-to-end agentic AI engineering.

Multi-Class Credit Risk Assessment System [\[GitHub\]](#) [\[Live Demo\]](#)

- Built an **end-to-end multi-class credit risk prediction system** (P1–P4) using XGBoost, Random Forest, and Logistic Regression on **51K+ customer records** with 87 features; improved high-risk (P3) class recall from ~30% to ~75% via **class-weighted optimization**.
- Developed production ML pipeline with **FastAPI** model serving, **Streamlit** dashboard, **SHAP** explainability, **MLflow** experiment tracking, Docker containerization, and cloud deployment on Render.

SQL Shield: ML-Based SQL Injection Detector [\[GitHub\]](#) [\[Live Demo\]](#)

- Engineered **98 handcrafted security features** from 30K+ SQL queries capturing obfuscation, tautology, UNION-based, time-based, and stacked-query patterns; achieved **0.995 F1-score** and **0.9994 ROC-AUC**, validated on 30/33 adversarial evasion payloads.
- Deployed real-time detector with **FastAPI + Streamlit**, SHAP-based prediction explanations, and full unit/integration test coverage — production-deployed on Render.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, SQL

AI / ML: Regression, Classification, Neural Networks, Transformers, XGBoost, Scikit-learn

Generative and Agentic AI: RAG, LangChain, LangGraph, FAISS, Qdrant, LangSmith, Groq

Data Science: NumPy, Pandas, Matplotlib, Seaborn, SHAP

MLOps & Deployment: FastAPI, Streamlit, Docker, MLflow, Render

Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Firecrawl

ACHIEVEMENTS

GATE CS 2025: AIR 1476 among 1,70,825 candidates (Top 0.8%)

GATE Qualifications: Qualified GATE CS 2024, GATE DA 2024, GATE DA 2025

POSITIONS OF RESPONSIBILITY

Main Organizer & Conductor, CuriousClue – Cynosure 2025 (National Tech Fest)

- Led end-to-end planning, execution, and team coordination
- Managed communications with 500+ students and faculty
