EDUCATION

National Institute of Technology Karnataka

M.Tech Computer Science and Engineering (Information Security) – CGPA: 8.86/10

Surathkal

Aug 2025 – Present

Sri Venkateswara University College of Engineering

B.Tech Computer Science and Engineering – CGPA: 8.98/10

Tirupati, AP

Dec 2021 – May 2025

PROJECTS

Tutor-AI: RAG-based AI Study Assistant

[\[GitHub\]](#)

- Developed a full-stack **RAG-based AI product** (FastAPI + FAISS + PostgreSQL, React) with user-facing features: PDF/PPTX/image OCR, Anki-style spaced repetition, adaptive MCQ quizzes with weak-topic detection, voice scoring, and semantic **YouTube search across 200+ channels**.
- Implemented secure multi-user architecture with JWT auth, bcrypt, user-scoped FAISS indexes, and ownership checks across **40+ API endpoints** — writing clean, production-grade code.

StratOS: Autonomous Multi-Agent Competitive Intelligence System

[\[Live Demo\]](#) [\[GitHub\]](#)

- Designed an **agent-first system** using **LangGraph** to orchestrate 4 specialized agents (Scout → Analyst → Strategist → Writer), using **tool use and model reasoning** to automate competitor research with minimal human intervention.
- Deduplicated signals via **Qdrant** vector similarity, reasoned with **Groq Llama 3.3 70B**, and shipped a full-stack **REST API** to production on Render + Docker with PostgreSQL (Neon) and **LangSmith** observability.

SQL Shield: ML-Based SQL Injection Detector

[\[Live Demo\]](#) [\[GitHub\]](#)

- Engineered 98 handcrafted security features from 30K+ SQL queries; achieved **0.995 F1-score** and **0.9994 ROC-AUC**, validated on 30/33 adversarial evasion payloads.
- Deployed real-time detector with **FastAPI** + Streamlit, SHAP-based explanations, and automated testing — production-deployed on Render.

Multi-Class Credit Risk Assessment System

[\[Live Demo\]](#) [\[GitHub\]](#)

- Architected a multi-class credit risk prediction system (P1–P4) on 51K+ customer records with 87 features; improved high-risk (P3) recall from ~30% to ~75% via class-weighted optimization.
- Developed production ML pipeline with FastAPI serving, Streamlit dashboard, SHAP explainability, MLflow tracking, and Docker deployment.

TECHNICAL SKILLS

Languages: Python, C, C++, SQL

Agentic & Generative AI: LangGraph, LangChain, RAG, Prompt Engineering

AI Coding Tools: GitHub Copilot, Claude Code

Vector & Data Infra: FAISS, Qdrant, LangSmith, PostgreSQL

ML / Data Science: XGBoost, Transformers, Scikit-learn, NumPy, Pandas, SHAP

MLOps & Deployment: Docker, MLflow, Render, Streamlit

Web Development: FastAPI, REST APIs, React, Git

ACHIEVEMENTS & CERTIFICATIONS

- GATE CS 2025:** AIR 1476 among 1,70,825 candidates (Top 0.8%)
- Introduction to Model Context Protocol (MCP), Anthropic [\[Certificate\]](#)
- Claude Code 101, Anthropic [\[Certificate\]](#)

POSITIONS OF RESPONSIBILITY

Main Organizer & Conductor, CuriousClue – Cynosure 2025 (National Tech Fest)

- Led end-to-end planning, execution, and team coordination
- Managed communications with 500+ students and faculty
