EDUCATION

National Institute of Technology Karnataka

M.Tech Computer Science and Engineering (Information Security) – CGPA: 8.86/10

Surathkal

Aug 2025 – Present

Sri Venkateswara University College of Engineering

B.Tech Computer Science and Engineering – CGPA: 8.98/10

Tirupati, AP

Dec 2021 – May 2025

TECHNICAL SKILLS

Languages: Python, SQL, C++, C

Statistics & Machine Learning: XGBoost, Random Forest, SHAP, Regularization, Class Imbalance Handling

Deep Learning & GenAI: Neural Networks, Transformers, RAG, LangChain, LangGraph, Prompt Engineering

Data & Retrieval: Pandas, NumPy, FAISS, Qdrant, PostgreSQL

Tools & Deployment: FastAPI, REST APIs, Streamlit, Git

RELEVANT COURSEWORK

Data Structures & Algorithms, Machine Learning, Deep Learning, Generative AI, Probability & Statistics, Database Management Systems, Operating Systems, Computer Organisation and Architecture, Computer Networks

PROJECTS

Tutor-AI: RAG-based AI Study Assistant

FastAPI, FAISS, PostgreSQL

[Demo Video](#) · [GitHub](#)

- Developed an end-to-end RAG pipeline (FAISS + PostgreSQL) with multimodal PDF/PPTX/image ingestion, OCR, and semantic search across 200+ YouTube channels; shipped adaptive MCQ quizzes with weak-topic detection.
- Architected a secure multi-tenant setup (JWT auth, bcrypt) with user-scoped FAISS indexes and ownership checks across 40+ API endpoints.

StratOS: Autonomous Multi-Agent Competitive Intelligence System

LangGraph, Qdrant, Groq Llama, LangSmith

[Live Demo](#) · [GitHub](#)

- Designed an agent-first orchestration pipeline (Scout → Analyst → Strategist → Writer) using LangGraph to automate competitor research and multi-step tool use with minimal human input.
- Reduced duplicate signals via Qdrant similarity search; reasoned with Groq Llama 3.3 70B, added LangSmith observability for agent tracing, and deployed on Render.

Multi-Class Credit Risk Assessment System

XGBoost, Random Forest, FastAPI, Streamlit, SHAP

[Live Demo](#) · [GitHub](#)

- Architected a multi-class credit risk prediction system (P1–P4) on 51K+ customer records with 87 features; improved high-risk (P3) recall from ~30% to ~75% via class-weighted optimization.
- Developed ML pipeline with FastAPI serving, Streamlit dashboard, SHAP explainability, MLflow tracking.

SQL Shield: ML-Based SQL Injection Detector

XGBoost, SHAP, FastAPI, Streamlit

[Live Demo](#) · [GitHub](#)

- Engineered an ML-based SQL injection detector with 98 custom features on 30K+ queries; identified and fixed a data-leakage issue and a false-positive bias, raising precision from 52% to 97% and reaching a 0.98 F1 score.
- Validated against 45 independent real-world attack patterns (91% detection rate); deployed with FastAPI and SHAP explanations, backed by automated tests on every update.

ACHIEVEMENTS

- GATE CS 2025:** AIR 1476 among 1,70,825 candidates (Top 0.8%)
- Qualified GATE CS 2024, GATE DA 2024, GATE DA 2025

CERTIFICATIONS

- Anthropic: Claude Code – [Certificate](#)
- Anthropic: Introduction to Model Context Protocol (MCP) – [Certificate](#)
- NPTEL: Data Analytics with Python (Score: 75%) – [Certificate](#)

VOLUNTEERING & COMMUNITY

Main Organizer & Coordinator

2025

CuriousClue – Cynosure 2025 (National Tech Fest)

Sri Venkateswara University

- Led end-to-end planning and execution, coordinating communications across 500+ students and faculty for a multi-day national technical fest.
